

## SPECIAL ASSEMBLY ON "SINGLE USE PLASTIC"

Plastic had been a big gift to mankind. But its misuse has become curse for all of us.

To learn about its harmful impact on the environment, a special assembly on "SINGLE USE PLASTIC" was conducted in Primary Department by the students of class P4 C on 29<sup>th</sup> July, 2019.

The assembly started with few videos which showcased a plastic filled river in Solan district of Shimla, followed by how plastic is made, how it pollutes the water bodies and finally reaches our dining tables, leaving us with diseases.

Children presented a talk show where they spoke about why we should not use single use plastic and things we can replace it with.

Later, children presented their view on single use plastic in the form of self-composed poems.

The assembly concluded with a pledge "REFUSE IT, IF WE CANNOT REUSE IT" which was taken up by all the students and teachers.
