

Conference on 3D printing for NPSC Schools at Gyan Bharati School by Socio Economic Welfare Society

A conference on 3D printing Technology was organized ON 7TH July 2017, for the Principals of National Progressive Schools' Conference (NPSC) Schools at Gyan Bharati School, New Delhi by Socio Economic Welfare Society. Shri Ashok Pandey, Chairman of NPSC said that In future, 3D Printing Technology will transform many industrial activities and also bring changes in business models by opening up the doors to a whole new world, so today's students need to have acquaintance with this technology. Shri R.C. Shekhar, Director of GBS, the host school conveyed that the objective of this conference was to provide awareness to the Heads of the Schools on this technology and discuss its career prospects for students. During the presentation on 3D Printing Technology and its application, Mr. Sanjay Khanna, the Convener of the Socio-Economic Welfare Society demonstrated how any solid physical object can be made through this technology. He further explained in what way it is expected to replace not only traditional manufacturing processes but also create new dimensions in professional fields like medical science, engineering, art & sculpture etc. Ms. Babita Khanna, Gen. Secretary of the Society discussed the usage of this technology in school education and how it can make learning more effective. The response of the first 3D Printing training course, organized at Gyan Bharati School in the summer holidays earlier, also discussed. The Principals and teachers present at the conference were of the general view this was the technology of the future and that the young generation should get acquainted with it for their better future in the global work environment.
