

## **NIGHT OUT ASTRONOMY SESSION REPORT**

Z Life Education in collaboration with Gyan Bharati School, Saket organized a night sky observation session at Camp Mustang, Sohna Road from 23<sup>rd</sup> of February to the 24<sup>th</sup> of February, 2017. The session introduced the concept of constellations, planets and their natural satellites. Camp Mustang proved to be the best spot for such observation. In the open fields of Aravalli, the learners spotted different planets (Venus, Mars, Saturn, Jupiter) as well were thoroughly engaged in the treasure hunt organized on the same lines. The learners also enjoyed various adventure activities like wall climbing and obstacle course. The session was a visual treat for the curious learners as well as provided them the necessary interaction and space to explore on their own.
